

Maria Laura Nombrado

Software Engineer

lauran.developer@gmail.com

TECHNICAL SKILLS

Web Development: React.js, Next.js, TypeScript, HTML, CSS, JavaScript, Node.js, Django, Flask, REST APIs

Scripting & Programming Languages: Python, Bash, Shell

Cloud Providers (IaaS): AWS, Azure, OpenStack

Containerization & Orchestration: Docker, Kubernetes, OpenShift, VMware PKS, AWS EKS, Mesos, Marathon, Helm

Continuous Integration and Delivery: Jenkins, GitLab, Azure DevOps, AWS Developer Tools

Version Control: Git

Infrastructure as Code: Ansible, Terraform, AWS CloudFormation, Azure ARM

Operating Systems: Windows, Unix (macOS), Linux

WORK EXPERIENCE

Senior Software Engineer

March 2021 – Present

Quonderbox IT Solutions

- Developed and implemented highly responsive UI components using React, Next.js, and TypeScript.
- Designed and implemented backend services with Node.js and Express.js, developing and managing REST APIs.
- Provisioned, managed and automated environments, deploying applications on AWS.
- Designed, developed, and implemented automated CI/CD pipelines.
- Migrated a Flask application codebase to AWS Lambda functions, improving scalability and performance.
- Contributed as part of the development team on Gurulytics (NestJS SEO/marketing dashboard backend for Online Marketing Gurus), Boreco (React/Next.js project management web tool), and SalesLights (AI sales automation platform with a Chrome extension and AWS Lambda backend).

Cloud DevOps Engineer

October 2019 – February 2021

Stratpoint Technologies, Inc.

- Built, monitored, and managed cloud infrastructure and workloads.
- Automated provisioning of cloud infrastructure in AWS using CloudFormation.
- Designed and implemented automated CI/CD pipelines using GitLab CI.
- Provisioned, managed, and maintained Kubernetes clusters for dev and production.
- Led "Landing Zone," a cloud center-of-excellence initiative for AWS/EKS provisioning and migration patterns.
- Delivered multiple Globe Telecom projects: migrations to VMware Tanzu (PKS) and AWS EKS, Azure DevOps POCs, and Pay2Globe containerization.
- Handled cloud migrations, application refactoring, and containerization across multiple client applications, including the Globe UNI/UPS project — provisioning AWS, PKS, EKS, and ECS environments, implementing CI/CD pipelines and automations, and providing ongoing support.
- Mentored and guided team members in their technical direction and goals.

DevOps Engineer

February 2019 – September 2019

ING Business Share Services BV Branch

- Supported an agile development process with CI/CD automation and Azure cloud environments.
- Developed and maintained CI/CD GitLab pipelines, ensuring smooth release and rollbacks.
- Automated provisioning, scaling, and management of OpenShift clusters using Ansible.
- Provisioned Azure and OpenShift environments and supported release management for the ING Digital Mobile Bank application.

R&D Engineer / Software Engineer

July 2014 – January 2019

Nokia Technology Center Philippines, Inc.

- Led overall feature development from planning to delivery.
- Designed and developed microservices and tests for AVA, Nokia's open analytics framework for telecom operators, including data-visualization use cases (Mapbox/Tippecanoe, Arcadia) and service-broker integrations.
- Contributed C/TDD feature development for the Nokia TRX base transceiver station component.
- Automated Docker image builds, tests and deployments using Ansible, Mesos, and Jenkins/GitLab CI.
- Automated provisioning and deployment of infrastructure on OpenStack using Terraform.

System Developer

July 2013 – July 2014

Octal Philippines, Inc.

- Developed ERP system modules: HRIS, payroll, purchasing, warehouse, accounting, project management.
- Performed NetSuite project-specific configurations and customization scripts using SuiteScript for engagements including the GMA demo and the Freyfil client system.

RTL Engineer / Assistant Logic Integration Engineer

November 2010 – January 2013

ROHM LSI Design Philippines, Inc.

- Led multiple projects from estimates and planning through implementation, integration, and testing.
- Completed high-quality digital IC designs and developed RTL code (Verilog/VHDL).
